

THCA Raw Extract Medium Pressure

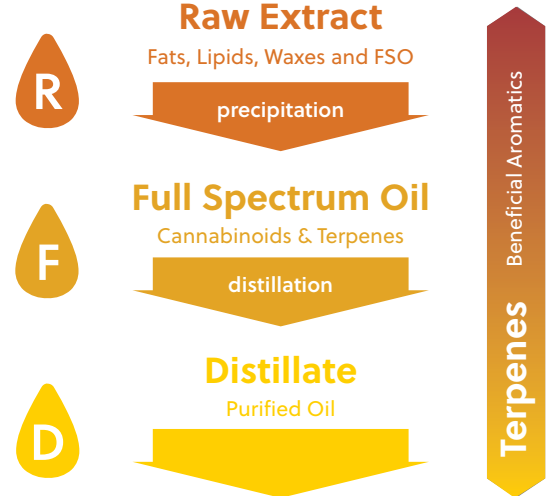

A minimally processed Supercritical CO₂ THCA extract that retains terpenes, flavonoids, and raw cannabinoid compounds.

40-80% THC/THCa API¹

¹Management estimates actual API concentration may vary

Applications:

These supercritical CO₂ full spectrum raw extracts can be purchased as is for premium hash, terpene collection, topicals, pre-roll infusion or as feedstock to your refining operations.

Cannabinoid	% wt	mg/g
Total THC [(THCA x 0.877) + D9-THC]	71.636	716.539
Total CBD [(CBDA x 0.877) + CBD]	0	0
THCA-A	61.861	618.607
D9-THC	17.384	173.841
CBGA	1.669	16.689
CBG	0.667	6.672
CBDA	BLQ	BLQ
D8-THC	ND	ND
CBC	ND	ND
CBN	ND	ND
CBD	ND	ND
THCV	ND	ND
CBDV	ND	ND
Terpenes	% wt	
Trans-Caryophyllene	0.291	
Farnesene*	0.218	
Linalool	0.197	

Abbreviations: wt% = percentage of weight, ND = None Detected, BLQ = Below Limit of Quantification, LOQ = Limit of Quantification, * = Mixture of Isomers

Supercritical CO₂ Extraction
Tap into Endless Sky's supercharged THAR processing capacity for cost effective biomass processing and crude oil extraction.

THCA Raw Extract (Medium Pressure) from Endless Sky is produced to the highest standards for purity and retention of beneficial compounds. It is high-potency and free from contaminants. Our THCA Raw extract can be custom refined and blended to meet any of your needs.

For brands looking to purchase large volumes of oil products delivered to consistent specs, we will take custom orders for raw THCA/CBDA extract, winterized and decarbed full-spectrum oils, or refined and blended distillates.

We've filled the tank, just tell us where you want to go.

160,000 KG annual capacity

Fully licenced facility standard processing licence

CO₂ capture process

Built to GPP & EU GMP standards

Product purity preservation

Automated full-flow system to vastly reduce human contact with the product

Automated continuous batch flow

Operational redundancies to ensure consistent production output

To request a full COA or discuss an order-to-spec
